Product Overview

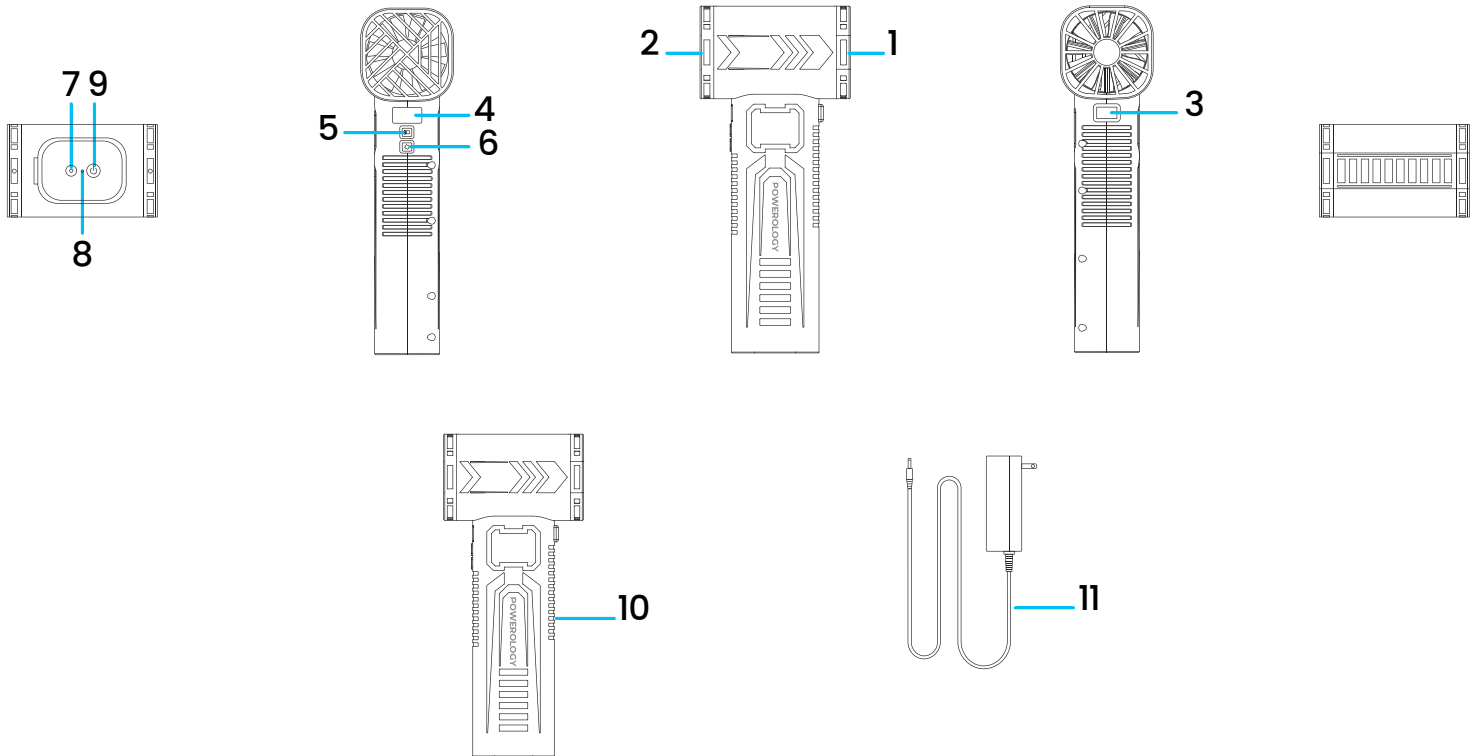

The Powerology PowerFlow Turbo Blower Fan offers a powerful 55000rpm turbo motor, delivering high-speed airflow for efficient cooling. It features a built-in digital display and four adjustable speed levels, allowing for personalized airflow control. The fan also includes an integrated LED light for added convenience and versatility. Perfect for various uses, it combines robust performance with ease of use, making it an ideal solution for cooling and drying needs.

Specifications

Battery Capacity	24000mAh (6x 4000mAh)
Rated Power	1000W
Input Voltage	DC 25V/1.2A
Fan Speed	5500RPM (Level 1)15000RPM (Level 2)41000RPM (Level 3)55000RPM (Turbo Mode)
Working Time	10-180 Minutes (Depending on the Speed Level)
Charging Port	DC Charging Port
Charging Time	3h
Product Size	74 x 120 x 277mm
Product Weight	900g
Model Number	PWF201

10. hosts ×1
11. adapter ×1

Setup Guide

1. Power On/Off

Power Switch: Press and hold the power button to turn the device on and off. The device will enter standby mode after powering on.

Lighting Switch: Tap to turn the light on or off.

2. Gear Switching

After turning the product on, press the button once to select Gear 1. To switch to Gear 2, press the button again. Press once more to switch to Gear 3.

To pause, press and hold the button.

Fan Dynamic Graph Display: The fan speed increases with each gear setting. The higher the gear, the faster the fan speed; the lower the gear, the slower the speed.

Violence Mode: Press once to switch to the highest gear, which represents the "Violence Mode" for increased intensity.

3. On-Screen Display

Battery Level Display: The battery is divided into five segments, with each segment representing %20 of the total charge. The display turns red when the charge drops below %20. As the charge increases, the display shows more segments in green.

Voltage Display: Displays the real-time voltage, providing an accurate reading of the device's current power status.

4. Recharge

Charging Indicator Light: The red light illuminates when the device is plugged in for charging and turns green once fully charged.

The product comes with a charging cable, which should not be used while the device is operating.

Maintenance and Cleaning

Store safely: Keep this product out of the reach of children and pets to ensure safety.

Storage conditions: Store the product in a dry, cool place. Avoid placing it in high-temperature areas, especially in direct sunlight or in the car.

Battery care: To preserve the battery's lifespan, avoid overcharging or deep discharging the product, as this may damage the battery core.

Air inlet and outlet maintenance: Regularly clean the air inlet and outlet to ensure proper airflow and efficiency.

Handle with care: Avoid pressing or rubbing the air inlet and outlet with sharp objects or nails, as this may cause damage.

Cleaning instructions: Do not use harsh chemicals such as alcohol, nail polish remover, or detergents to clean the product, as this can lead to malfunction, breakage, or color fading.

Safety Precautions

To minimize the risk of electric shock, injury, death, or damage to the product or property, observe the following precautions:

Charging Cable

Do not use the charging cable if it becomes hot, as it may cause burns, electric shock, or a fire hazard.

Never unplug the charging cable with wet hands to avoid the risk of electric shock and injury.

Do not damage, modify, break, or twist the charging cable.

Avoid placing heavy objects on the cable or applying excessive force during charging, as this can lead to malfunction or electric shock.

If the charging adapter is damaged, replace it immediately to avoid any safety risks.

Use and Storage

Avoid inserting foreign objects into the air inlet and outlet while the product is in operation, as this may cause damage.

Do not immerse the product in water, as it may cause a malfunction.

Do not use the product in a humid environment to ensure its longevity.

Important Usage Instructions:

Do not use the product with wet hands.

Avoid using LPG or other flammable products (such as paint thinners) near the product, as these may cause an explosion or fire.

Keep the product away from corrosive substances and fire or heat sources to prevent short-circuiting.

Do not use the product near water sources such as bathtubs, showers, or washbasins.

Avoid using the product on the skin or hair, especially when the airflow is directed toward the body.

Keep the product in a well-ventilated, dry area, and protect it from direct sunlight to maintain its efficiency.

In Case of Malfunction or Abnormalities

If any issues such as non-functioning, frequent stopping, smoke, or unusual sounds occur, immediately stop using the product and follow these steps:

Disconnect the product from the power source.

Consult the user manual for troubleshooting or contact a professional service provider.

The illustrations in the manual may differ slightly from the actual product due to design upgrades. Always refer to the product specifications for the most accurate information.

Disposal

This product must not be disposed of as unsorted household waste. It is important to separate such waste for proper treatment and recycling, in compliance with local waste management regulations.

Warranty

Products that you buy directly from our **Powerology** website or shop come with a 24-month warranty.

The 24-month warranty applies to products purchased directly from our **Powerology** website or store. If **Powerology** products are bought from any of our verified retailers, then the product is eligible for only a 12-month warranty. To extend your product's warranty, visit our website **powerology.me/warranty** and fill in your details in the provided form along with an uploaded picture of the product to process your request. Once approved, you will receive a confirmation email of the extended product warranty. Upload the required information within 48 hours of purchase to be eligible for a 24-month warranty period.
