

**12 SOCKET**  
**MULTI-PORT TOWER HUB**

**USER MANUAL**

PWCUQC013-BK

## Product Introduction

Thank you for choosing this product. This is a Power strip with USB charger that combines 12 AC outlets with 2 USB, 2 PD charging ports and 1 wireless charger to satisfy your need for power supply. For optimum performance and safety, Please read these instructions carefully before connecting, operating or using this product. Please keep this manual for future reference.

## Product Specification

Surge Protector with USB Charger

Dimensions: 103\*103\*226mm (L\*W\*H)

Interface: 12 Outlet 2 USB Ports, 2 PD Ports,

1 Wireless Charger

Input Voltage: AC 100V-250V 50/60Hz

Rated Power: 3250W-13A Max. 250V~

Output: AC outlet\*12+type-c\*2+QC\*2+wireless charger

PD: Single work is 45W, 2PD work PDis 20W\*2,

QC: Single QC is 18W, 2 QC working is will be share 5V

Wireless Charger: 15W

Surge Energy Rating: 1700 Joules

Material: PC+ABS Flame retardant grade 94V0

## Product Feature

### Safety

1. Made of fireproof material that ensures it to remain functional in the environment under 750 °C, fire resistance of up to 94V0 level.
2. Synchronous rectification technology: largely reduce energy loss and improve electric energy conversion.
3. Certified by UKCA to ensure the safety, high qualityInternal metal interfaces offer good conductivity.
4. 1700-Joule Surge Protection can protect your home/office electronics from power disturbances such as lightning, surges and spikes. It features two LED indicators (Power & Protected).

## Compatibility

1. Power strip with USB charger- just plug into an wall power strip, extend it to 2 USB, 2 PD charging ports and 1 wireless charger and 12 AC outlets, saving you from plugging multiple usb adapters. Input voltage: 100-250V for worldwide use, Max 3250W. suitable for most home.
2. It can intelligently detect and charge most USB devices at ideal output. Perfect for camera, mp3, smartphone, tablet, Bluetooth speaker, power bank etc.
3. Synchronous Rectification Technology:  
Greatly reduce charger's energy loss and heat, improve conversion rate.
4. Soft LED indicator doesn't disturb you when sleeping.
5. The switch can completely shut off electronics when not in use, helping to conserve energy.

## Quality

Tested many times for power strip, arrange delivery according to the requirement of enterprise quality and provide technical support or excellent service.

## Safety Precautions

1. Sum power of all attached devices should not exceed rated power of this unit.
2. Do not cover the unit with anything to prevent overheat.
3. Do not use the unit in a house / room with humid air.
4. Do not repair, disassemble or modify the USB charger by yourself.
5. Connected through an improperly grounded AC outlet may lead to potential injury.
