## Features

1. Equipped with a digital display for monitoring charge levels.
2. TYPE-C Two-Way Fast Charging that supports PD35W power for efficient charging.
3. Compatible with charging protocols of various fast charging products on the market.
4. Durable and tactile rubberized exterior for enhanced grip.
5. Ensures rapid energy transfer with minimal loss as a result of high transfer efficiency.
6. Features a lithium-ion cell renowned for its high safety and stability.
7. Maintains charge for extended periods with long standby time.
8. Compatible with a diverse range of mobile phones.
9. Includes a smart program to prevent overcharging, discharging, and short circuits.
10. Small and easy to use, ideal for on-the-go activities.

| 2. Type-C PD Input and Output | 4. Power Button      |

## Specifications

Battery Capacity	Li-ion 10050mAh / 37.185Wh
USB-C PD Input	35W DC 5V/3A, 9V/3A, 12V/3A, 15V/2.33A, 20V/1.75A
USB-C PD Output	35W DC 5V/3A, 9V/3A, 12V/3A, 15V/2.33A, 20V/1.75A
USB-A QC Output	22.5W DC 5V/3A, 9V/2A, 12V/1.5A
SCP	DC 5V/4.5A, 4.5V/5A
Shared Output	DC 5V/3A Max
Dimensions	105×65×21.5mm

## Charging

### **A. Charging the Power Bank**

To recharge your power bank, connect it to a computer, car charger, or wall charger using the Type-C cable. The power bank will begin charging automatically. The LED digital display will show the current power level, and the next power indicator will flash to signal charging progress.

### **B. Charging Other Devices**

Using the charging cable for your device (not included), connect your device to the power bank via the USB outputs or Type-C output. Press the power button once; the LED digital display will show the current power level, and the power bank will begin charging your device while indicating the remaining charge. Once charging is complete, press the button twice to turn off the power bank, or it will automatically shut off after approximately 35 seconds of inactivity.

## Warning

1. Never leave the battery charging unattended.
2. Avoid exposing the power bank to high humidity or liquids. Store in a cool, dry place when not in use.
3. Do not damage or puncture the power bank's casing, as this may lead to overheating, fire, or explosion.
4. Avoid placing the power bank near heat sources such as radiators, stoves, or in environments where temperatures exceed 40°C (104°F), like inside a car on a hot day or in direct sunlight.
5. Do not use the device in strong electrostatic or electromagnetic fields as this could reduce its lifespan.
6. If the power bank emits an odor, excessive heat, becomes discolored, or is visibly distorted, stop using it immediately.
7. Only qualified service personnel should service the power bank. If it is damaged, leaking, or not operating normally, do not attempt to open or repair it yourself to avoid risks such as overheating, fire, or explosion.
8. At the end of its lifecycle, dispose of the power bank properly at a designated battery recycling facility.
9. If the power bank is not used for over three months, its battery capacity may decrease but will recover after 4-3 charge and discharge cycles.

## **Warranty**

Products that you buy directly from our **Powerology** website or shop come with a 24-month warranty.

The 24-month warranty applies to products purchased directly from our **Powerology** website or store. If **Powerology** products are bought from any of our verified retailers, then the product is eligible for only a 12-month warranty. To extend your product's warranty, visit our website **powerology.me/warranty** and fill in your details in the provided form along with an uploaded picture of the product to process your request. Once approved, you will receive a confirmation email of the extended product warranty. Upload the required information within 48 hours of purchase to be eligible for a 24-month warranty period.
