Application Scenarios

1. The product offers a high-capacity battery, compact size, and lightweight design, making it highly portable and versatile for various usage scenarios.

Long-distance Level

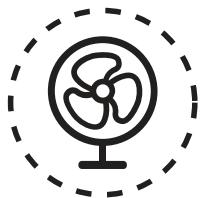

Camping and Picnicking

Wilderness Exploration

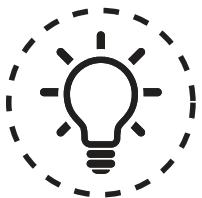

2. The product features both AC input and output functions, allowing for quick recharging of the device itself and providing emergency power to various devices such as fans, mini refrigerators, light bulbs, mini rice cookers, and more.

Small Fan

Mini Rice Cooker

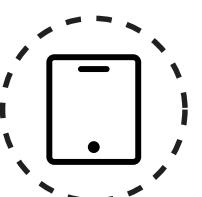

Light Bulb

3. The product features a DC output function that provides emergency charging for devices such as smartphones, tablets, digital cameras, laptops, and more. It also includes multiple DC output interfaces, allowing you to charge several digital devices simultaneously.

Laptop

Tablet

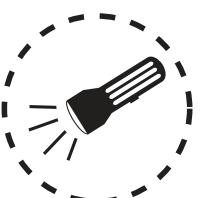

Smartphone

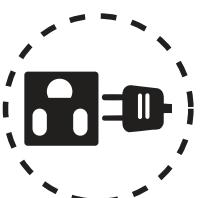

4. The product features an LED lighting function with high-brightness LEDs, designed for durability and ideal for outdoor activities. The LED light offers multiple modes, including high-brightness lighting, brightness adjustment, strobe, and an SOS distress signal.

Power On/Off

Press and hold the "Power On/Off Button" for 2 seconds to power on the product. The display screen will light up, showing the current battery level. The fan will perform a self-check and light up the fan icon, then automatically turn off after 3 seconds.

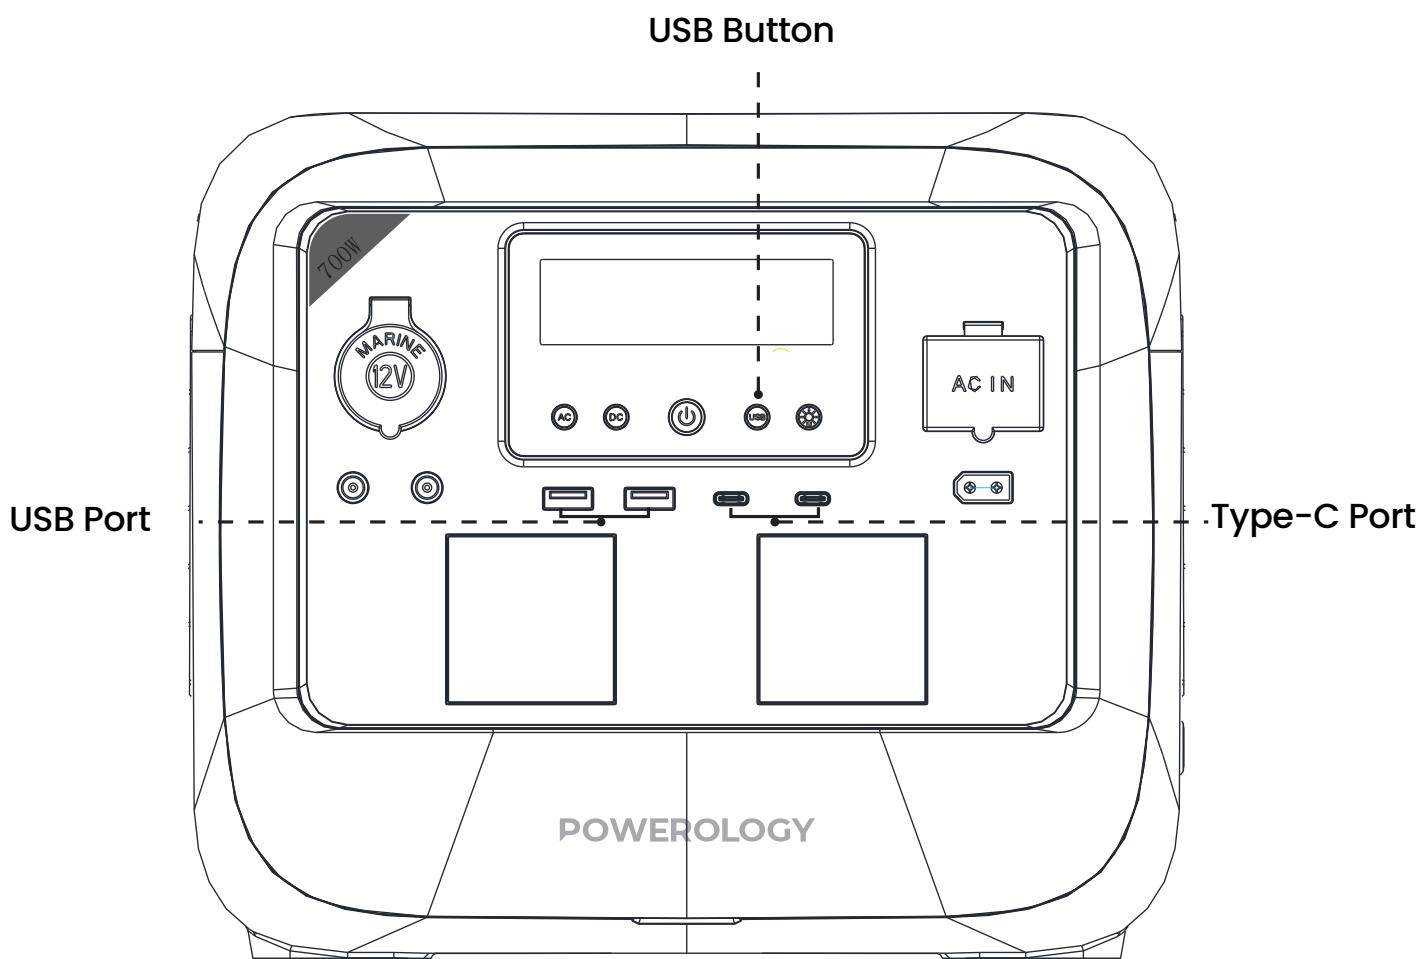

LED Light Operation

After powering on the product, press the "LED Light Control Button" briefly to activate the LED light in a constant-on mode, which will illuminate the LED light icon. While in this mode, press and hold the "LED Light Control Button" to adjust the brightness. To cycle through the light modes (constant-on, low brightness, SOS, flashing, off), press the button briefly.

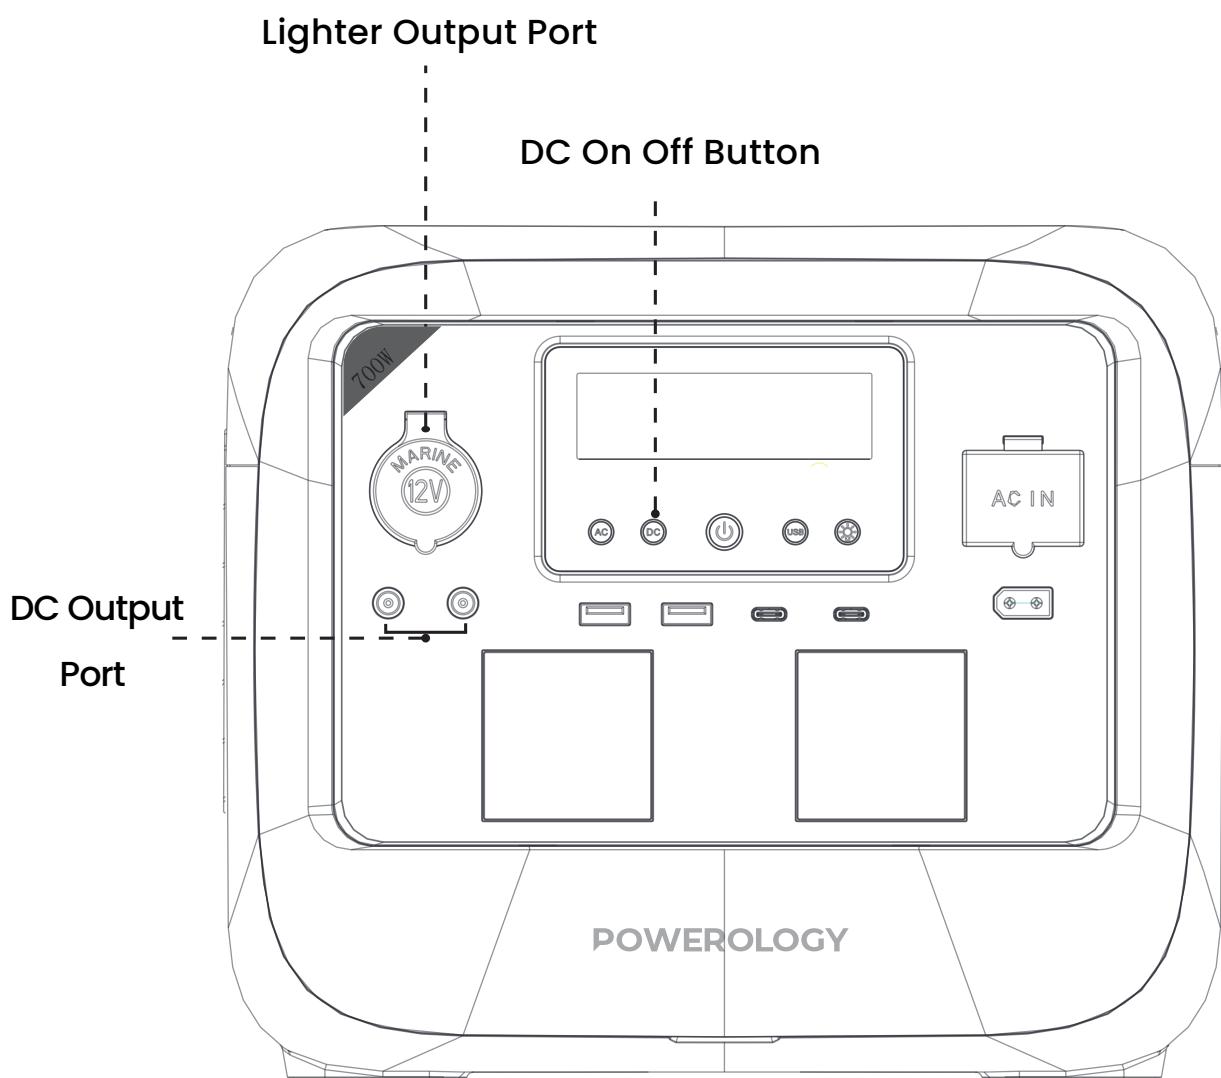

USB Output

1. After turning on the product, briefly press the "USB On/Off Button" to activate the USB output function. The Type-C icon, USB icon, and output power icon will appear on the display.
2. Connect your digital device to the product using the appropriate cable. Once connected, the device will begin charging, and the corresponding power value will be displayed on the screen.
3. When charging multiple devices simultaneously through various output ports, the total output power will be shown on the display.

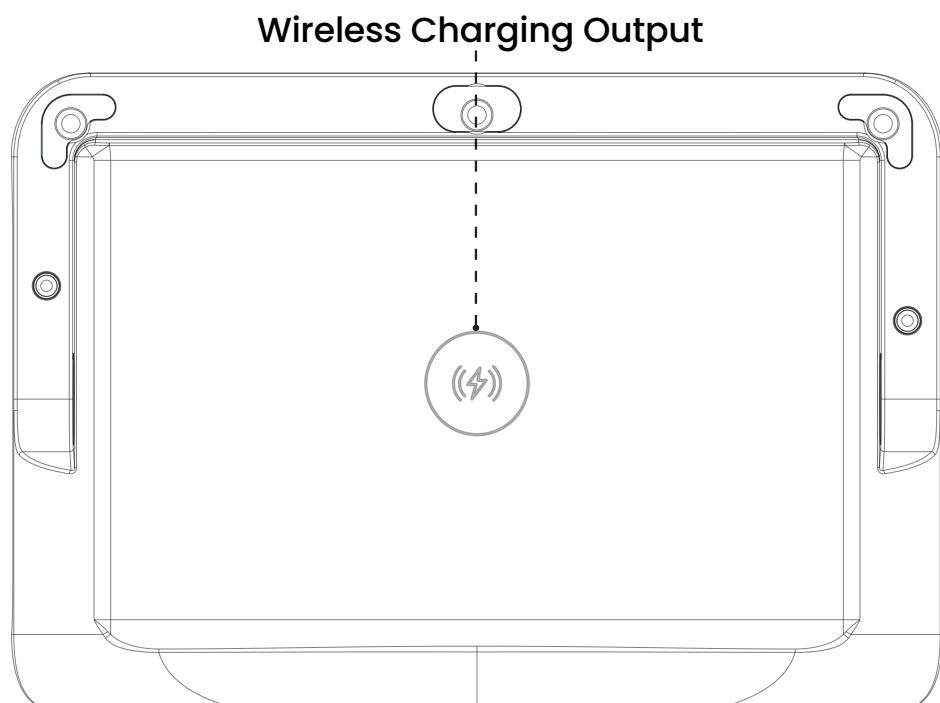

DC and Lighter Output

1. After powering on the product, briefly press the "DC On/Off Button" to activate the DC output function. The DC 12V icon and DC output power icon will illuminate on the screen.
2. Connect your digital device to the product using the appropriate connector to begin charging.

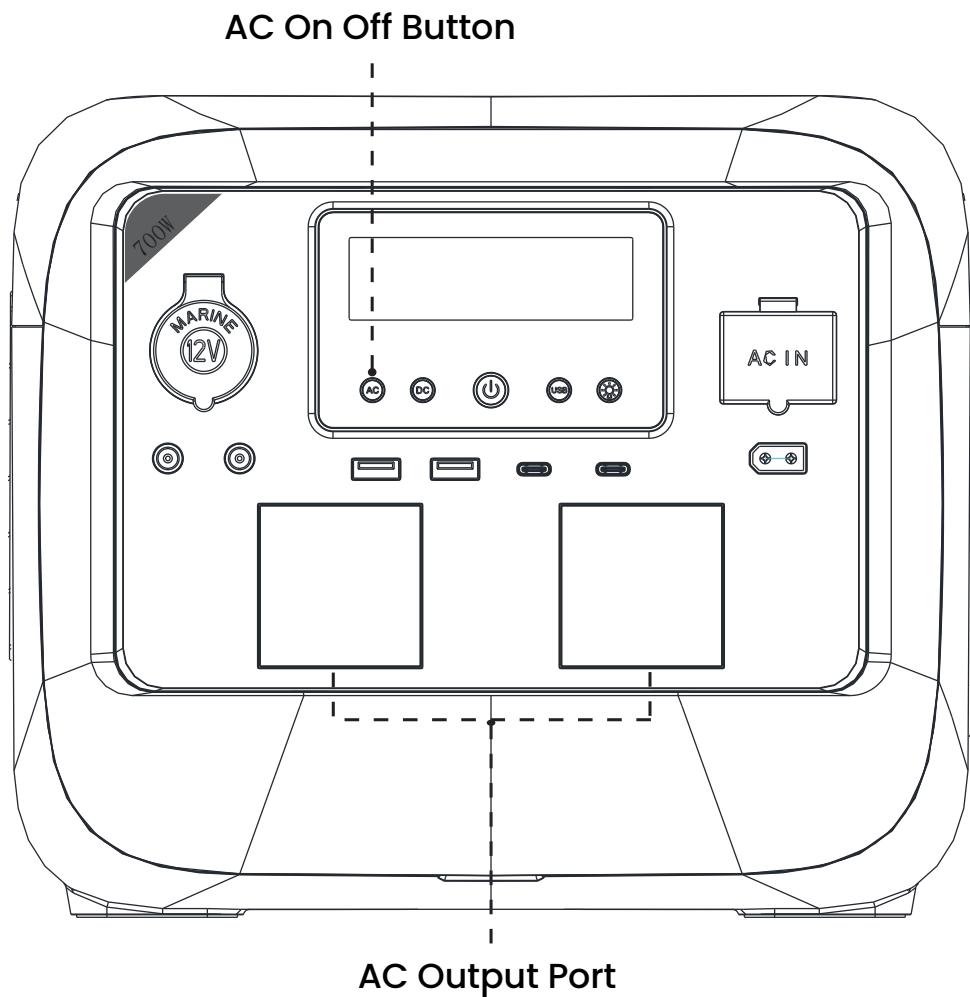

D Wireless Charging

1. After powering on the product, briefly press the "DC On/Off Button" to activate the DC output function. The DC 12V icon and DC output power icon will appear on the display.
2. Place your digital device in the center of the product to charge it wirelessly, with a maximum output of 15W.

D AC Output

1. After turning on the product, press the "AC On/Off Button" briefly to activate the AC output function. The AC output power icon and AC frequency icon will be displayed.
2. Connect the device requiring power into the AC output port. The corresponding power value will be displayed.

D Charging the Power Station

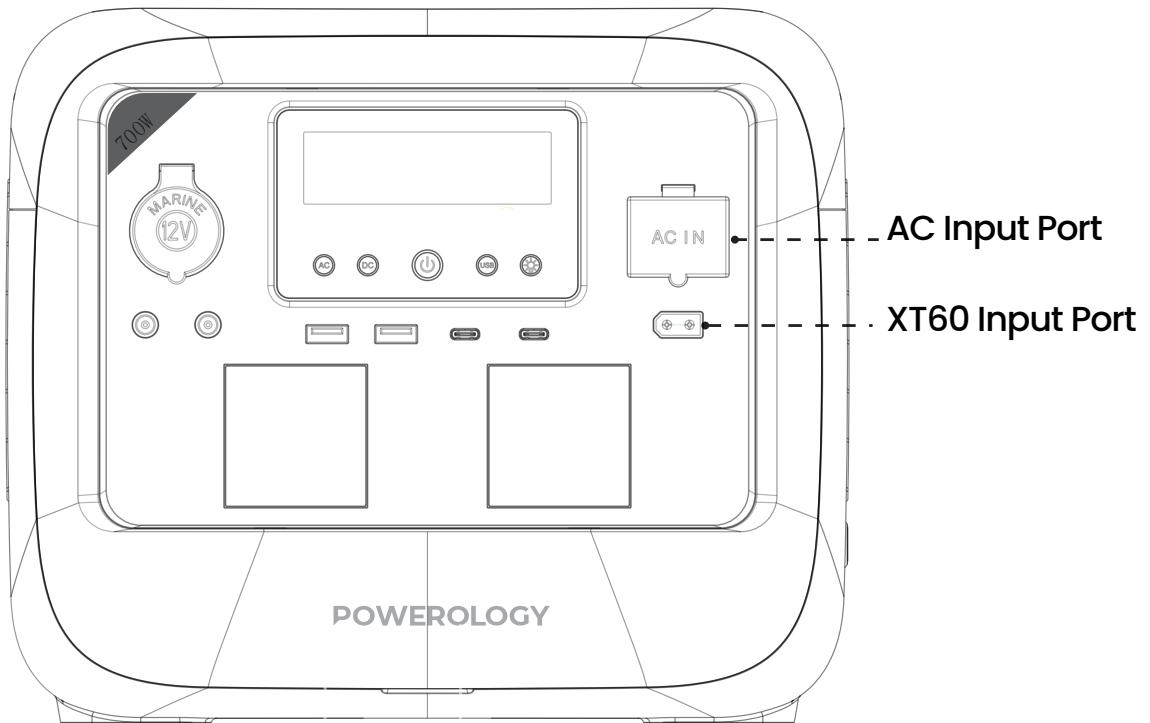

1. Charging via the AC Input Port

1.1 To charge the product, connect the included AC power cord to the AC input port and plug it into the mains. The maximum charging power is 500W. The display will show the current charging power, and the fan will start, displaying the fan icon.

1.2 Silent Charging Mode: While charging, double-click the AC button to activate silent charging mode, which limits the charging power to about 150W. This mode reduces fan noise to its lowest level.

2. Charging via the XT60 Input Port

This product features an XT60 solar input port that supports charging at 12-60V, with a maximum charging power of 350W.

Specifications

Model	PWGC700
Battery Capacity	472.5Wh
Voltage	230V
Frequency	50Hz
MPPT Solar Input	350W max (12-60V)
AC Input	500W
AC Output	700W Rated Power - 1400W Peak Power
USB-A Output	5V/3A, 9V/2A, 12V/1.5A, 18W
USB -A2 Output	5V/2A
USB-C1 Output	5-15V/3A, 20V/5A, PD100W Max
USB-C2 Output	5V/2A, 15W Max
Wireless Output	5W, 7.5W, 10W, 15W
Car Port Output	12V/10A, 120W Max
x552I 2 DC Output	12V/10A
Uninterruptible Power Supply	500W max, 20ms Response Time
LED Light	4W LED Light, with SOS Function
Operating Temperature	-10°C to 50°C (Discharge), 0°C to 40°C (Charge)
Humidity	0-95 % (Non-condensing)
Weight	7kg
Product Dimension	222×187×266mm

Troubleshooting

Error Code	Description	Instructions

FAQs

Q1: Will the product shut down automatically when idle?

A1: Yes. After the product is powered on, it will automatically enter sleep mode and shut down after 3 minutes if no outputs are activated. If any output is activated, the product will shut down after 4 hours without output power. To cancel this auto-shutdown function for a single session, press and hold the AC + Power On/Off button for 5 seconds.

Q2: Does the product support screen-off operation?

A2: Yes, it supports screen-off operation. To turn off the screen, double-click the “Power On/Off Button,” then click again to turn it back on.

Q3: Does the product support charging and discharging simultaneously?

A3: Yes, the product supports charging and discharging at the same time. When charging via AC, the AC output functions as a bypass.

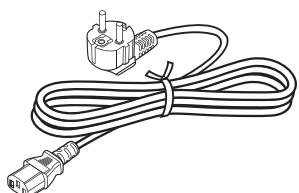

Q4: Does the product support simultaneous AC and DC charging?

A4: Yes, it supports simultaneous charging from both AC and DC sources. When charging both simultaneously, the AC power output is fixed at 150W.

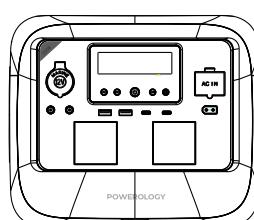

Q5: How does the fan operate?

A5: The fan automatically adjusts its speed based on the internal temperature and the charging/discharging power. No manual operation is required to activate the fan.
